TITLE OF PROBLEM/PROJECT
SANJIVANI MEDICAL

DISCIPLINARY/INTER-DESCIPLINARY	DESCILPLINARY	
ERP	DESCIPLINE	COMPUTER ENGINEERING

Branch: COMPUTER ENGINEERING

Specific Area of Work: WEBSITE (FOR MARKETING AND SELLING ONLINE)

Scope of the Work: Within One Discipline: ✓ **Or Interdisciplinary:**

The Problem Abstract:

Our website Sanjivani Medical provides facility to buy online ayurvedic medicines. Our website offers variety of categories like Bhasma, Churna, Chyawanprash, Cough & Cold, Ghrit, Eye Drops, Honey, Tablet and Others. Our website also offers discounts on limited products. Customers are able to search and buy any product by using sorting and filtering function. Customers can also zoom-in all products for better product view. Customers can also read product description and additional information to purchase any product from our website. Customers can recommend our website's products to anyone by using sharing option. Customers are able to give ratings and reviews for our products. Even customers will receive a confirmation mail on ordering any product. Customers can also contact us for any queries and complains.

Detailed Description :

Admin-

The various details of admin are store. Through this, admin can login in to the system and manage the entire system. Admin can perform a number of operations such as view, add, update and delete products, users, categories and feedbacks.

- **user_login :** Login of admin
- **user_pass :** Password of admin
- **user_email :** Email address of admin
- **user_url :** URL of admin profile
- **user_registered :** Registration time of admin
- **user_status :** Status of admin

Product-

The various details of product are stored. Admin can view, add new products, update existing or delete products while the user can only view products and its details.

- **product_id :** ID of product
- **sku :** Stock Keep Unit
- **rating_count :** Number of rating given to product
- **product_qty :** Quantity of product

Category-

The various details of categories are stored here. Admin can view, add new categories, change categories of products and update or delete categories. Users can view and filter by these categories.

- **category_id :** ID of category
- **name :** Name of category
- **slug :** URL-friendly slug of category

Order-

The orders store orders made by user. Admin can view order, also admin can cancel order. User can view status of order.

- **order_id :** ID of order
- **order_count :** Count of order
- **order_date :** Date of order
- **order_price :** Price of order
- **order_menu :** Menu of order
- **order_status :** Status of order

Order-

User can comment or review the product. Admin can manage the comment. User can only view his comment when the admin approves it.

- **comment_id :** ID of comment
- **comment_author :** Author of comment
- **comment_date :** Date of comment
- **comment_type :** Type of comment

Payment

To confirm the order user needs to make payment after filling necessary information through this system. There are two type of payment method like COD and online shopping. Admin can manage the payment.

- **token_id:** ID of token
- **getway_id :** Id of getway
- **user_id :** Id of user
- **Type :** Type of payment token

User

User can search product. User can give comment and review our product. User can buy product from our site. User can make payment after order.

- **Id:** ID of User
- **user_login :** Login Name of User
- **user_status :** Status of user
- **user_pass :** Password of user
- **user_email :** Email of user

GUJARAT TECHNOLOGICAL UNIVERSITY

Diploma Engineering Semester-V

FUTURE ENHANCEMENT:

We will enhance our website by, creating Android application and configure both of them. We will also add many more different products of different categories. We will also add many functionalities like stock details, order cancellation, festival discounts, etc.
